Expand your Zone of Protection on the Farm with PERAGUARD® AH

Does your on-premise biosecurity go beyond the foot pan? With **PeraGuard® AH**, your protection goes further and lasts longer than traditional foot pan disinfectants.

Fill the Foot Pan Once, Then Top It Off – No Replacement!

With **PeraGuard® AH**'s proprietary dry peracetic acid formula, there's no need to replace your foot pan sanitizer regularly. Top it off when supply gets low or dirty.

Here's Where Alternatives Quit

The average liquid foot pan sanitizer quits working quickly; you constantly need to replenish the entire foot pan to keep up with harmful pathogens to match the effectiveness of **PeraGuard® AH**, costing you more money and leaving your farm premise vulnerable.

Expand Beyond the Barn

Boot traffic tracking pathogens into other places, including offices, vehicles, and outbuildings, can decrease biosecurity. That's why **PeraGuard® AH** goes where the traffic goes and stays put for maximum protection.

Effective Beyond the Foot Pan

Use **PeraGuard® AH** to protect animal housing, processing facilities, surfaces, and more. No need for multiple products – less is more!

Learn more and connect with **PeraGuard® AH** distributors and start expanding your **zone of protection** on the farm.

Spread Out Your Zone of Protection

The further **PeraGuard® AH** is tracked from the foot pan, the better your biosecurity. Our unique, water-activated formula clings to boots and tires and spreads protection around the farm.

Zone of Protection: **PeraGuard® AH** is long-lasting and doesn't need to be replaced super frequently, because its zone of protection remains in effect.

Downstream Impact: **PeraGuard® AH** "evergreen" chemistry is environmentally friendly, especially compared to chlorine-based foot pan disinfectants.

No Odor: Chlorine-based foot pan treatments stink. **PeraGuard® AH** emits no odor.

EPA Registered: EPA registration means **PeraGuard® AH** works as intended, and that efficacy is verified with independent testing.

Efficacy: **PeraGuard® AH** is effective against bacteria and viruses, and a dry formulation that increases the zone of protection with each step.

Spread the Protection: The more **PeraGuard® AH** is tracked on surfaces, the better the protection. Track it into offices, other buildings, and animal stalls.
